

MOHSSINE ECHLAHI

Software Engineering Student | Java Backend Developer

mohssineechlaihi85@gmail.com | +212 613 757 244 | Fkih Ben Salah, Morocco | github.com/mohssine0e | [linkedin.com/in/mohssineechalaihi](https://www.linkedin.com/in/mohssineechalaihi)

Profile

Fourth-year Computer Engineering student at ENSA Al Hoceima (ENSAH), focused on Java backend development and distributed systems. Hands-on experience designing Spring Boot microservices, REST APIs, and full-stack applications. Fast learner, strong problem-solver, and active open-source / Linux user. Seeking a PFA internship (2–3 months) to contribute to real-world backend or full-stack projects.

Technical Skills

Programming	Java, Python, C, C++
Backend	Java, Spring Boot, Spring Data JPA, Spring Security, Spring Cloud Gateway, Hibernate, RESTful APIs, WebClient
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Databases	MySQL, PostgreSQL, MongoDB, Oracle Database, PL/SQL
DevOps & Tools	Git, GitHub, GitLab CI/CD, Docker, Maven, Linux (Arch), Swagger / OpenAPI
Concepts	Object-Oriented Programming (OOP), MVC Architecture, Microservices Architecture, Distributed Systems, Data Structures & Algorithms, REST API Design, OWASP Security Basics
Other Experience	PHP, Laravel, Blade Templating Engine

Experience

Web Development Intern — ShiftBricks 2024 · 2 months

Laravel, PostgreSQL, Docker, GitLab

- Designed and built a complete license management platform end-to-end: requirements analysis, system design, implementation, and deployment.
- Developed backend with Laravel (MVC), implemented authentication and core business logic; built frontend with Blade, HTML and CSS.
- Designed and optimized the PostgreSQL schema; containerized the app with Docker and managed releases via GitLab.

Key Projects

Student Enrollment System — Microservices Architecture Spring Boot, Spring Cloud Gateway, React, Docker

- Built a distributed system for managing students, courses, and enrollments with independent Spring Boot services (Student, Course, Enrollment) communicating via WebClient behind an API Gateway.
- Applied database-per-service design (MySQL) for loose coupling and scalability; documented all endpoints with Swagger/OpenAPI.
- Built a React dashboard for enrollment workflows; implemented business rules such as capacity limits and cancellation policies.

University Academic Management Platform — Full Stack Laravel, MySQL, Bootstrap

- Built a multi-role academic platform (admin, professor, coordinator, department head) with granular role-based access control.
- Implemented custom Laravel middleware for route protection and role/permission verification on every request.
- Designed a normalized relational schema (MySQL) with Eloquent ORM relationships (one-to-many, many-to-many) for courses, enrollments, and grades.
- Delivered core modules for courses, scheduling, and grade management with a responsive Blade/Bootstrap UI.
- Used Laravel's validation layer and form requests to enforce data integrity across all CRUD operations.

Education

Engineering Cycle, Computer Science 2022 – Present

ENSA Al Hoceima (ENSAH) · Coursework: Spring Boot, Microservices, Advanced JavaScript, Application Security

Preparatory Cycle for Engineering Studies 2022 – 2024

ENSA Al Hoceima (ENSAH)

Baccalaureate in Physics — Mention Très Bien 2021 – 2022

Lycée Bir Anzaran, Fkih Ben Salah

Certifications

Oracle Cloud Infrastructure 2025 AI Foundations Associate — Oracle | **Oracle Certified Associate, Java SE 17 — Oracle** (*in progress*)

Leadership, Languages & Interests

Leadership: Chess Club President — organized tournaments, coordinated activities, and led member engagement.

Languages: Arabic (Native) | French (B2) | English (B2)

Interests: Backend Engineering, Distributed Systems, Open Source, Chess
